Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-2 recite the limitation "the space" in lines 4 and 3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Hamilton et al. [US 5,296,854].

Regarding claims 1-2: Hamilton discloses a system for increasing pilot situational awareness, comprising:

-a navigation component (50) that determines an aircraft spatial location, position and attitude;

-a scene generator (20) produces virtual images of the space into which the aircraft is flying based on the aircraft location (met by the external world images);

-a head up display that displays virtual images of the external world to facilitate increasing pilot situation awareness [see Figs. 1-2,6-7 and the Abstract, col. 8, lines 1-19, lines 65-68 to col. 9, lines 1-3].

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hamilton et al.

Regarding claim 3: Hamilton discloses a system for increasing pilot situational awareness, comprising:

- a navigation component (50) that determines an aircraft spatial location, position and attitude;

- a scene generator (20) produces virtual images of the space into which the aircraft is flying based (met by the external world images);

- a head up display that displays virtual images of the external world to facilitate increasing pilot situation awareness [see Figs. 1-2,6-7 and the Abstract, col. 8, lines 1-19, lines 65-68 to col. 9, lines 1-3]. Hamilton does not specifically show a second head up display for displaying second virtual images. Since, one head up display is capable of displaying the external world of the aircraft, employ an additional display would merely provide more display image. Therefore, it would have been obvious of one having ordinary skill in the art at the time of the claimed invention to have an additional head up display in the system for the purpose of display more images.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Briffe et al. [US 6,057,786] and Hausmann [US 6,686,850].
